

PRODUCT: FERRIC CHLORIDE LIQUID (40% - 42% Solution)

PRODUCT DESCRIPTION

Ferric Chloride Liquid from Perumal Chemtech is a high-purity industrial coagulant agent widely adapted across municipal filtration networks and manufacturing plant systems for efficient purification, heavy metal extraction, and floc aggregation.

TECHNICAL SPECIFICATIONS (IS 711-1970)

PARAMETER	TARGET SPECIFICATION RANGE
Appearance	Clear, Dark Brown Liquid
Active Matter (FeCl₃ Content)	40.00% – 42.00% w/w
Specific Gravity (at 25°C)	1.42 – 1.45
Ferrous Salts (FeCl ₂)	0.10% max
Insoluble Matter	0.20% max
Free Acid (as HCl)	1.00% max

KEY APPLICATIONS

- Primary coagulation for industrial and domestic water clarification systems.
- High-grade copper etching fluid for printed circuit board (PCB) engineering.
- Odour and pipeline corrosion abatement by precipitation of environmental sulfide components.
